1979 editorial index

MANAGEMENT

Japanese and western quality—a contrast, Part I — Jan. p8
Japanese and western quality—a contrast, Part II — Feb p12
Cost-optimized calibration — Feb p22
What is quality? — Mar p54
Common sense could be called a quality program — Apr p14
Everybody has problems — May p46
Follow through with quality — June p10
Phil Crosby: A change in career — June p16
Rediscovering asset management — June p36
Optical comparator—unlimited versatility — Aug p22
The decision tree — Sept. p62
Memorex—a total quality program — Sept p82
100% inspection plus — Sept p102
Microfilm technology helps quality — Sept p113
Automotive research—an extensive realm — Oct p20
Datsun QA program in US — Oct p44
Quality's annual salary survey — Oct. p50
Soothing sensitive circuits — Oct p42
MIL-Q-9858A—an effective management tool — Dec p46

QUALITY ENGINEERING

Small lot sampling plan — Jan p14
Precise calibration of high frequency voltage sources — Jan p38
Vibration quiz — Feb p19
Performance test on the firing line — Mar p10
Practical documentation for standards laboratories — Mar p32
Navstar-GPS: Where we are, where we'll be, Part I — Apr p44
Navstar-GPS: Where we are, where we'll be, Part II — May p18
Navstar-GPS: Where we are, where we'll be, Part III — June p24
Software QC — May p56
Quality costs—where to start, Part I — Aug p36
Quality costs—where to start, Part II — Sept p70
Quality costs—where to start, Part III — Oct p40
Contact resistance revisited — Sept p14
Managing calibration operations — Sept p91
Taking fewer steps simplifies program — Sept p99
QA for computer software — Sept p110
Testing with the minimum sample size — Nov p17
The "low-down" on hi-pot testing — Nov p24
Ten commandments for quality auditors — Nov. p36
In-house quality training . . . a blueprint — Nov p40
Figuring noise figure — Dec p18
Simple, sensible sampling — Dec p25

INSPECTION

This laboratory is for problem prevention — Jan p18
Cutting the high cost of test equipment maintenance — Jan p22
A few mean the most — Feb p17
Coordinate measuring machine calibration—the bar bell method — Mar p18
NDT rates a reactor — Apr p22
Independent test labs: Saving the manufacturer time and money — Apr p31
Contract inspection service — May p13
The heat gun: for checking hot places — May p33
In-plant implant inspection — June p32
Designers guide to surface texture — June p40
A technique for fault site detection — Sept p56
Behind the red doors — Oct p14
HEX used on jet engines — Nov p14
Do-it-yourself metrology system — Dec p12
Met lab = equipment + expertise — Dec p40

AUTOMATIC TEST AND INSPECTION

Automatic edge finding — Jan p28
Distributed computers put pacemakers through their paces — Feb p26
Light Emitting Diodes: Automotive uses are the next big step — Mar p56
Assuring ATE quality — Apr p50
Automatic insertion with on-line testing — May p38
Testers: Reliability and serviceability — June p44
Something's brewing — Aug p10
Desktop computers in the microwave lab — Aug p28
Flexibility in process testing — Sept p52
For whom does Bell Toil? — Oct p32
A burning decision — Nov p52
ATE monitors motors — Dec p42

QC IN MANUFACTURING

Testing hardness preserves tool life — Apr p27
Quality weighs in — May p51
A quality edge — Aug p15
EFI quality meets today's requirements — Aug p18
Centralized testing — Nov p48

SPECIAL FEATURE

1979 Inspection, Testing and Quality Assurance Show — Apr p36
ATE Seminar/Exhibit — May p52
Gateway to NDT technology — Sept p74
ATE in the City of Roses — Dec p34

PROCUREMENT

Quality from the start — May p24
Can 100% testing be eliminated — May p42
Vendor evaluation checklist set #4 — Sept p45
Test equipment procurement: the library concept — Oct p25

BASIC TRAINING REVIEW

Preparation of samples for x-ray spectroscopy — Jan p43
Basic random sampling — Feb p33
Ultrasonic probe materials and characteristics — Mar p51
Impact test uses a drill press — Apr p55
Across the Poisson table — May p63
Down the Poisson table — June p47
Down and Across the Poisson table — Aug p33
More from the Poisson table — Sept p109
One more use for the Poisson table — Oct p61
The universal sampling plan 1979 — Nov p54
CMM calibration plate — Dec p45

INSTRUMENTATION SCOUTING REPORT

Noncontact inspection — Jan p45
Moisture sensor for microcircuits — Jan p45
Hand-held portable multimeter — Feb p30
Video-based computer processing — Feb p31
Measurement of thin metal foils — Mar p49
Voice entry speeds reporting — Apr p58
One system serves production and R&D — Apr p59
Frequency counter fits in shirt pocket — Apr p59
Independent lab keeps pace with NDT needs — May p67
Portable electronic indicator — May p68

Independent lab keeps pace with NDT needs — May p67
Portable electronic indicator — May p68

Specimen preparation June p51
Visual inspection aided by audio Aug p46
Microprocessor improves the efficiency of incoming inspection tests Aug p46
Eight-channel recorders aid gas turbine development Sept p86
These CATs are ATEs Sept p88
Temperature monitor for product assurance Oct p46
Two-directional flaw/couplant monitor system Oct p58
Spectrograph provides economical metals analysis Nov p30
Analyzer uses sensor pad to measure surface finish Nov p89
Microprocessor-based universal testing machine control system Dec p29
A pair of portable 35 MHz oscilloscopes Dec p73

EDITORIAL COMMENT

Still an uphill battle Jan p5
Quality and inflation . . . similar root causes Feb p7
Killing the dragons Mar p5
"Your way of life" . . . still valid today Apr p5
Yes, frustrating and unreasonable—it's still the law May p5
Another resource to be conserved June p5
But when will we wake up? July p5
It happened . . . but let's learn from it Aug p5
Hey guys we're on the same team Sept p4
Big brother ain't helpin' Oct p5
We're closer than you think Nov p5
What is commitment? Dec p5

QUALITY AND THE LAW

Prognostications Jan p55
Model product liability code Mar p59
Of lawnmowers and village idiots Apr p65
Useful safe life May p71
International safety law developments June p55
The slippery slope of professional liability July p59
Recognizing latent hazards Aug p43
Don't give up on record keeping Sept p117
Of screw threads and jobs Oct p65
The CPSC and safety standards development Nov p59
Product safety policies: a comment Dec p51

THE QUALITY SCENE

The marketing manager and quality statistics Jan p53
Is everybody average Feb p39
Victims and victors of variability Mar p63
Pareto probes medical malpractice Apr p61
What can we learn from the Japanese May p73
Who was Vilfredo Pareto? June p53
East is east, and west is west: More on Japan July p15
We can't turn the clock back Aug p41
Adversarial occasions Sept p119
The dire consequences of unilateral cost reduction Oct p67
Quality as a distribution Nov p57
Jack of all trades? Dec p49

METRIC MEMO

Quietly at work Jan p57
The second time around Mar p64
Attitude adjustment May p75
Metriscape July p16
A multinational view Sept p115
Metric football Nov p61

MANAGEMENT VIEWPOINT

Employees: The key to customer relations Feb p37
No time to spare apr p67
Helping the troubled employee June p57
Coping with your superior's incompetence Aug p45
Energy conservation and you Oct p69
When money is not the answer . . . Dec p53

QUALITY AT RANDOM

Fallere's Law or the Thermochromatic Effect Feb p52
Meeting the foreign challenge: New standards for broadcast products June p67
Nuclear economics prove unpredictable Aug p51
Dam-Atoll harnesses ocean waves Sept p145
Economist analyzes Soviet labor productivity Sept p147
Foiling Murphy's law Nov p73
Technical help to exporters Dec p70
